

As we know with the growing problems with such drugs as Fentanyl, Carfentanil and W18, it can become challenging for Health Canada to sign off on accepting properties and equipment to be clean after identifying labs etc. We not only have qualified NFPA accredited responders for entry and assessment, we have a product that neutralizes these drugs. We in addition have PHD Chemists on hand to assist with sampling and sign off of these impacted properties and equipment.

These services can support multiple agencies and companies such as;

- Insurance Companies
- Airport Authorities
- Fire Departments
- Paramedics
- Police, CBRNE, CBSA
- Correctional Facilities
- Public Transit
- Health Care Facilities
- Large Public Functions

Rapid Response Can Supply the Following Services:

- Essential Neutralizing Product For Your Needs
- Training On Utilizing The Product or Projects
- Full Response 24/7 To Unplanned Events
- Full Decon Support with OSHA Compliant Equipment for Gross Decontamination of People
- Support For Public Venues
- 24/7 Dedicated Emergency Response Line
